

SPONSORSHIP PACKAGE

BUILT ON **THE ROCK.**
BOUND FOR **THE STARS.**

ABOUT US

This project promises to be a valuable asset to Memorial University and its students. Beyond equipping team members with a diverse range of technical and non-technical skills, it will also enhance the university's reputation as a hub for innovation in robotics and space technology.

The Canadian International Rover Competition (CIRC) is a prestigious event that challenges post-secondary students to design and build a rover capable of operating on Mars. Participants collaborate to simulate early space settlement scenarios on an extraterrestrial surface, putting their prototype rovers to the test in either a winter or summer competition setting.

WHAT WE DO

Our team is dedicated to designing, building, and testing a Mars-ready rover for the Canadian International Rover Competition (CIRC). We collaborate on cutting-edge robotics, space technology, and engineering challenges, while bringing together students from diverse backgrounds including:

Mechanical

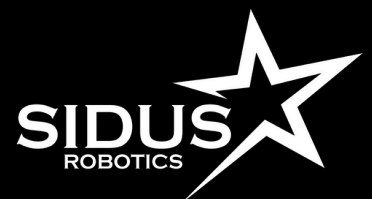

Electrical

Software

Business and Finance

SPONSORSHIP LEVELS

TIERS

SPONSORSHIP PERKS

BRONZE
< \$2,000

- COMPANY LOGO ON WEBSITE + SIDUS TEAM UNIFORMS
- SPOTLIGHT POST ON SOCIAL MEDIA
- SPONSOR SECTION IN ROVER UPDATE VIDEOS

SILVER
< \$3,000

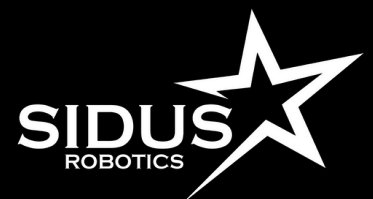

- ALL OF THE ABOVE
- COMPANY LOGO ON ROVER (SMALL DECAL PLACEMENT)
- COMPANY NAME MENTIONED DURING PRESENTATIONS

GOLD
< \$5,000

- ALL OF THE ABOVE
- MEDIUM-SIZE LOGO ON ROVER AND TEAM BANNER
- INVITATION TO DEMO DAY

PLATINUM
\$5,000+

- ALL OF THE ABOVE
- PREMIUM LOGO PLACEMENT (ROVER + WEBSITE + TEAM UNIFORMS)
- SPEAKING OPPORTUNITY OR PRESENTATION SPOT AT THE PUBLIC DEMO
